

BERNAL, J. D.

Science in History

London, Watts, 1957 (2^a ed.).

HG 1266

Acknowledgments	v
Preface	vii
Preface to the Second Edition	xv
Acknowledgments – Second Edition	xxiv

PART I

THE EMERGENCE AND CHARACTER OF SCIENCE

Chapter 1 – INTRODUCTION	1
1.1. Science as an Institution	6
1.2. The Methods of Science	10
1.3. The Cumulative Tradition of Science	18
1.4. Science and the Means of Production	22
1.5. Natural Science as a Source of Ideas	27

Part II

SCIENCE IN THE ANCIENT WORLD

Introduction	35
Chapter 2 – EARLY HUMAN SOCIETIES: THE OLD STONE AGE	38
2.1. The Origins of Society	38
2.2. The Material Basis of Primitive Life	39
2.3. The Social Basis of rational Science	43
2.4. The Origins of Rational Science	48
2.5. The Transformation of the Environment	51
2.6. Social Organizations and Ideas	55
2.7. The Achievement of Primitive Man	57
Chapter 3 – AGRICULTURE AND CIVILIZATION	59
3.1. Towards a Productive Economy	59
3.2. Civilization	66
3.3. The Techniques of Civilization	73
3.4. The Origin of Quantitative Science	78
3.5. The Class Origins of Early Science	87
3.6. Successes and Failures of the First Civilizations	91
3.7. The Spread of Civilization	95
3.8. The Legacy of Early Civilization	98
Chapter 4 – THE IRON AGE: CLASSICAL CULTURE	100
4.1. The Origins of Iron-age Cultures	100
4.2. Iron-age Cities	105
4.3. Phoenicians and Hebrews	108
4.4. The Greeks	110
4.5. Early Greek Science	118
4.6. The Athenian Achievement	133

4.7. Alexander's Empire	148
4.8. Rome and the Decadence of Classical Science	162
4.9. The Legacy of the Classical World	169

Part III

SCIENCE IN THE AGE OF FAITH

Introduction	175
Chapter 5 – SCIENCE IN THE TRANSITION TO FEUDALISM	178
5.1. The Developments of Civilization After the Fall of the Roman Empire	178
5.2. The Age of Faiths	181
5.3. Dogma and Science	185
5.4. The Reaction to Hellenism	188
5.5. Mohammed and the Rise of Islam	192
5.6. Islamic Science	196
5.7. The Decay of Islamic Culture	205
Chapter 6 – MEDIEVAL SCIENCE AND TECHNIQUE	208
6.1. The Dark Ages in Western Europe	208
6.2. The Feudal System	210
6.3. The Church in the Middle Ages	214
6.4. The Scholastics and the Universities	216
6.5. Medieval Science	222
6.6. The Transformations of Medieval Economy by New Techniques	228
6.7. The Development of Late Medieval Economy	243
6.8. The Achievement of the Middle Ages	245

PART IV

THE BIRTH OF MODERN SCIENCE

Introduction	251
Chapter 7 – THE SCIENTIFIC REVOLUTION	257
7.1. The First Phase: The Renaissance (1440-1540)	257
7.2. Art, Nature, and Medicine	265
7.3. Navigation and Astronomy	274
7.4. The Second Phase: Science during the First Bourgeois Revolutions (1540-1650)	281
7.5. The Justification of the Solar System	289
7.6. The New Philosophy	303
7.7. The Third Phase: Science Comes of Age (1650-90)	310
7.8. Making the New World-Picture	324
7.9. Celestial Mechanics: the Newtonian Synthesis	334
7.10. Retrospect: Capitalism and the Birth of Modern Science	343

PART V

SCIENCE AND INDUSTRY

Introduction	352
Chapter 8 – ANTECEDENTS AND CONSEQUENCES OF THE INDUSTRIAL REVOLUTION	358
8.1. The Early Eighteenth-century Pause (1690-1760)	358
8.2. Science and the Revolutions (1760-1830)	365
8.3. The French Revolution and its Effect on Science	379
8.4. The Character of Science in the Industrial Revolution	384
8.5. The Mid-Nineteenth Century (1830-70)	386

8.6. The Nineteenth-century Advances of Science	395
8.7. The Late Nineteenth Century (1870-95)	399
8.8. Science in the Late Nineteenth Century	405
Chapter 9 – DEVELOPMENTS OF THE SCIENCES IN THE EIGHTEENTH AND NINETEENTH CENTURIES	410
9.0. Introduction	410
9.1. Heat and Energy	413
9.2. Engineering and Metallurgy	424
9.3. Electricity and Magnetism	431
9.4. Chemistry	444
9.5. Biology	460
9.6. Retrospect	479

PART VI

SCIENCE IN OUR TIME

Introduction: The Twentieth-century Background – The Revolutions in Science and Society	491
Chapter 10 – THE PHYSICAL SCIENCES IN THE TWENTIETH CENTURY	511
10.0. Introduction	511
10.1. The Electron and the Atom	515
10.2. Theoretical Physics	524
10.3. Nuclear Physics	532
10.4. Electronics	542
10.5. Physics and the Structure of Matter	553
10.6. Twentieth-century Technology: Engineering	559
10.7. Chemical Industry	569
10.8. Natural Resources	573
10.9. War and Science	575
10.10. The Future of the Physical Sciences	586
10.11. Science and Ideas in an Age of Transition	593
Chapter 11 – THE BIOLOGICAL SCIENCES IN THE TWENTIETH CENTURY	599
11.0. Introduction	599
11.1. The Response of Biology to Social Influences	607
11.2. Biochemistry	616
11.3. Microbiology	633
11.4. Biochemistry in Medicine	641
11.5. The Structure and Development of Organisms: Cytology and Embryology	647
11.6. The Organism as a Whole and its Control Mechanisms	651
11.7. Heredity and Evolution	660
11.8. Organisms and their Environment: Ecology	673
11.9. The Future of Biology	687
Chapter 12 – THE SOCIAL SCIENCES IN HISTORY	693
12.0. Introduction	693
12.1. The Scope and Character of the Social Sciences	695
12.2. The History of the Social Sciences	707
12.3. Social Science in the Age of Feudalism	715
12.4. Social Science and the Birth of Capitalism	718
12.5. Enlightenment and Revolution	722
12.6. Utilitarianism and Liberal Reform	729
12.7. Marxism and the Science of Society	734
12.8. Academic Social Sciences in the Late Nineteenth and Early	

Twentieth Centuries	743
12.9. The Growth of Marxism in the Nineteenth and Early Twentieth Centuries	761
Chapter 13 – THE SOCIAL SCIENCES AFTER THE FIRST WORLD WAR	774
13.0. Introduction	774
13.1. General Character of Social Thought in the Twentieth Century	783
13.2. The Social Sciences in the Capitalist World	792
13.3. The Application of Social Science	798
13.4. The Science of Education	806
13.5. The Ideological Background	811
13.6. The Social Sciences in the Socialist World	820
13.7. Towards a New Science of Society	834
13.8. The People’s Democracies	848
13.9. The Future of the Social Sciences	856
PART VII	
CONCLUSIONS	
Chapter 14 – SCIENCE AND HISTORY	865
14.0. Introduction	865
14.1. Science and Social Forces	866
14.2. The Interaction of Scientific, Technical, and Economic Development	873
14.3. The Track of Scientific Advance	880
14.4. Science in a Class-divided Society	884
14.5. Science in the World Today	888
14.6. The Advancement of Science	903
14.7. Contemplation and Action	909
14.8. Organization and Freedom of Science	912
14.9. The World’s Need of Science	921
Bibliography	934
Notes to the Second Edition	951
Index	966
